RADHIKA ARORA

Computer Science Engineer

I'm Radhika Arora, currently in the final year of my course, B. Tech.

PROJECTS

August 2022

Chrome Extension

- This project was created using Front End Languages (pure HTML, CSS and JavaScript). This Chrome Extension helps us to save current opened tabs in the current window. Also, it also allows us to manually enter and delete records.

June 2020 - July 2020

Dice Rolling Simulator

- This project was created using Python inbuilt libraries and modules like Tkinter, random, which generated a random integer number within a provided range of numbers and everytime asks the user to generate for more till the time user terminates the game.

July 2021 - October 2021

Music Player

- This project was created using Android Studio with Java and XML. This Android application dealt with playing music/songs on the device which are present in the local memory area of the mobile.
